Looking at the News with Col. Hugh Clark

Senator Johnson, of California, wants to have Britain stigmatized as a defaulting debtor if she does not more than make a token payment on the war debt. Britain's reply is that inasmuch as the United States will not accept payment in the same way as the debt was created, viz. in goods and services, the United States is a defaulting creditor.

The Senator argues that a country that not only balances its budget but even shows a surplus is capable of making more than a token payment. Britain, on the other hand, would be only too glad if her debtors made token payments, and in these times all creditors should be pleased to see their debtors striving to become or remain solvent. That alone is a creditable achievement, for which creditors should be grateful.

If for nothing else than its exposure of the Imperial Tobacco Co.'s operations, the Stevens Committee has justified itself. The managers of that company while depressing the price of tobacco to the grower and cutting down the wages of its workers paid themselves large salaries and bonuses. It was a heartless business that deserves more than exposure.

Abdul Aziz Ibn Saud has one hundred and twenty wives, but the same despatch that gives this information conveys the additional information that he is a fearless fighter. We gather too, that he is not in favor of disarming.

Opposition members at Westminster demand to know many things—what the government's policy is re war debts, disarmament, Japanese competition, etc. It is a wise provision that makes the government subject to questioning, for if Opposition members do not know what government policy is, how can they oppose it? If they do it blindly they may find to their horror that the government agrees with them.

In an attempt to raise prices we run across cases where prices have been kept up by agreement and immediately we suspect something. Where does agreement to sustain prices cease to be a virtue and become a combination in restraint of trade?

It was noted that but few women were present at the Toronto reception to Mary Pickford. Her press agents are overplaying that "America's sweetheart" stuff.

Disarmament is dead in Europe, says a cable despatch. While it lived it raised quarrels enough to encourage armament.

KIRKCALDY NEWS

J. D. Hagerman took a load of cattle to Calgary Thursday.

Mr. and Mrs. Geo. Sefton of Didsbury are guests at the home of Mr. and Mrs. Wm. Todd.

Mrs. S. W. Lawrie returned home Saturday, after spending two weeks as a patient in the Vulcan Municipal Hospital.

Mrs. Ed. Laing returned home after spending two weeks in Banff as the guest of her brother, Mr. James Taylor.

At the time of writing, one inch of rain has fallen. After almost two months of drought everyone is feeling more optimistic. Smiles are more noticeable today than during the last two months.

Mr. Alfred Roebuck has been wearing a million dollar smile since about May 30th, the reason being that Mrs. T. Watts of Edmonton gave birth to a 9 lb. baby boy on that date. Mrs. Watts, before her marriage, was Miss Margaret Roebuck. Mother and baby are getting along splendidly. The little newcomer is being named after his proud grandparent. Our heartiest congratulations.

Roof And Walls Of Building Collapse

Weight of Water on Roof Strains Structure to Breaking Point; Building Unoccupied

Residents of Vulcan within the vicinity of the Burrows' garage building were startled on Monday morning about 8.45 o'clock when the side walls of the structure collapsed outward and the roof caved in. Luckily no persons were passing at the time for the consequences might have been serious.

The building is owned by A. L. Burrows of Edmonton, a former resident, and has been vacant since last fall, up till that time housing the Army Motors business.

The heavy rains during the early hours of Monday morning had found no escape from the flat roof or large size, for, on investigation after the drain pipe was plugged. The water quickly piled up till, it is thought, several inches had accumulated. This presented a tremendous weight and the central beam was strained to a breaking point, giving away and forcing the tile wall outward. The water that had laid on the roof gushed across the street.

Town workmen were quickly called to the scene and a barricade was erected around the portion that had fallen. The recent addition at the back of the main structure, built of brick, was undamaged as was the brick front. Several windows in the Memorial hall were broken by the falling tile.

ADDITIONAL LOCALS

Buy MONARCH paints, enamels, varnishes. Made in Alberta. Price and quality guaranteed. J. T. Willard.

Prices at the Smith coal mine are still \$2.50 for lump and \$1.25 for nut coal. Phone 903 for your next order of coal. Satisfaction guaranteed.

Although Monday was a rainy day several carloads from town and district journeyed to Calgary to take in the circus and in spite of the dampness the children of the crowd enjoyed the day; the grown-ups too.

According to the Champion Chronicle, Dean Smith of that town recently caught a pike in Lake McGregor that measured 44 inches long and 19 inches around the girth. It weighed 23 pounds.

J. H. Harback left today for Castor where he will visit with his son, Frank, during the summer months. He will later be joined by Mrs. Harback, who is at present visiting in Eastern Canada.

Services will be held at the United Church at the regular hours on Sunday. Morning subject "Burning Our Ship"; evening subject "A Divinity that shapes our ends." Special anthems by the junior and senior choirs at the morning and evening services respectively.

Members of the Vulcan softball team and followers met at the home of Bert Innes to elect officers for the season on Friday evening. Officers elected were as follows: Tom Wilson, president; Earl Robson, vice-president; Ralph Pritchard, coach; Harry Beeching, secretary; D. Simington, captain. After the election of officers, discussion on the activities of the season was held. Lunch was served by the host before the meeting adjourned.

The Kirkcaldy W.I. met at the home of Mrs. Henry Todd for their regular session on Thursday last. Nine members and two visitors were present. The president, Mrs. R. Clements called the meeting to order, which was opened by singing O Canada, followed by repeating the Creed. Roll was called by each member answering by telling of some current event. The main item of the afternoon was a paper on the League of Nations given by Mrs. Clements. It was decided to raffle a quilt to raise funds. Discussion as to the advisability of starting a circulating library was held. Decision will be made at the next meeting. At the close of the meeting the hostess assisted by her niece, Miss Cecille Johnston, served lunch. The afternoon closed with the singing of the National Anthem. The next meeting will be held at the home of Mrs. R. Clements on June 28th.

Town Council Hold Lengthy And Important Business Meet

Accept 1934 Consolidation Act; Hear Delegation of Merchants on Business Tax; Rescind Original Business By-Law

On Monday evening the Vulcan town council held one of their most important sessions of the year—and one of the longest. Councillors Wolfe and Jamieson were absent. A large number of taxpayers attended the meeting and numerous interviews were held.

Joe Dobbs was present and interviewed the council on the matter of the suggested sidewalk affronting the Imperial Hotel premises. Correspondence on the matter had not been answered he was told, and nothing could be done until communication had been received.

A delegation of business men were present and had as their spokesman, L. H. Stack. On behalf of the business taxpayers, Mr. Stack suggested that the business tax be cancelled and the difference made spread over the town as levy to the property owners. In the discussion that followed it was expressed by the council that this was not feasible, but that figures would be compiled for the purpose of showing the difference this would make to the property owner. It was brought out that the business tax had been in effect since Vulcan was established as a town.

The matter of paying the current business tax on May 15th was thought to work a severe hardship on the town merchants whose largest income came in the harvest season, said Mr. Stack. He suggested that a monthly payment plan be put into effect for those who had not paid and a discount be given those who had paid by or on May 15th. It was brought out that 73 per cent of the current business tax levy was collected by May 15th.

Moved by Councillor Wittcock that the original business tax by-law be rescinded and that those who had paid the tax during May be given a discount of 10 per cent, and that those who did not pay during May, make monthly installments of one-seventh of the amount for the next seven months, payable and due at the end of each month, and that those who make complete payment of the business tax in June be given 7½ per cent discount and 5 per cent in July. Carried.

Moved by Councillor Allan that the Tax Consolidation Act for 1934 be accepted by the council. Carried. It was decided to hold a meeting of the council on Friday evening, July 15th for the purpose of considering applications made for tax consolidation. Those wishing to take advantage of the Act are asked to have their applications in by that date, as the tax sale is being held on the Monday following, June 18th. The reserve bids for the different parcels of land in the sale will be set at this special meeting.

The following accounts were read and passed for payment on motion by Allan: D. C. Jones \$160.00; Fire Department \$24.50; W. D. Allan 20 cts.; H. W. Johnston \$12.34; Land Registrar \$7.90; Army Motors \$1.77; Browns' Garage 75 cts.; T. B. Lebeau \$16.00. A number of grocery accounts were passed on relief measures and a few were passed for payment to be applied on taxes.

An application for Mother's Allowance was approved by the council on motion by Councillor Ulrich.

An account from the Foster and Foster Funeral Home for \$70.00 was read for the funeral of James Johnston. The council understood the account to be \$50.00 and will only make payment for that amount.

An indigent account from Dr. H. P. Barker for \$10.00 was passed for payment on motion by Allan.

The matter of baking in private homes and selling the wares from house to house was brought to the attention of the council. R. H. Weale was instructed to notify these parties that the practise must be stopped or a license be taken out.

Parched Crops Receive Rains

Drouth Ends in Vulcan District; Welcome Rains Start Sunday Evening

Starting Sunday evening at 10:30 o'clock a generous rainfall lasted well into Monday morning and continued intermittently throughout Monday and Tuesday. According to the Searle Grain gauge 2.07 inches had fallen up till 6 o'clock Tuesday evening. In a phone call from Dan Sims of the Berwywater district at the time he stated that the rain gauge on his farm measured 1.82 inches.

Everyone is in a better frame of mind for the prolonged drouth of several weeks presented a serious menace to the growing crops and gardens. Rain came not a day too soon to save the parched wheat fields. According to daily press reports the rainfall is general throughout Southern Alberta and Saskatchewan.

VULCAN TEAM HEADS LEAGUE; FIVE GAMES

Undefeated as Yet in School League; Win From Carmangay and Lomond

On Friday evening the Vulcan high school team further strengthened their hold on top league position by defeating Carmangay on their own diamond. The score was 13 to 4. This makes the fifth straight win for the locals in the league play; they have yet to be defeated. In the season's play they have won eight straight out of nine.

In Friday night's game Vulcan took the lead from the start and were never in danger at any point of the game. They fattened their batting average by clean, long hits. Robson and Deal both clouted home-runs during the game. Carmangay has had tough luck since the league opened and have not won a game in five plays. They play a fair brand of ball, but Vulcan and the other two teams of the league seem to have the bag of tricks that win. Champion is the nearest contender for the top position with six points. Vulcan has ten.

On Wednesday evening the Lomond Juniors motored over and played an exhibition game on the local diamond with the Vulcan Juniors. The locals added still another triumph to their long list of victories by defeating the visitors 7 to 3. The fans that turned out for this game were given an exhibition of clean, fast playing in spite of the heavy wind. Vulcan collected nine hits, while Lomond collected four. No complete circuit runs were made. The game was one of the best played here this season.

Local line-up—Battery, Robson and Rutten; Harper, Snow, Craig, Kock, Lundgren, Ulrich, McIntyre and Deal.

OBITUARY

Gertrude Smith, two-year-old daughter of Mr. and Mrs. H. D. Smith of Stavely, died at Champion on Friday morning. The young girl had several relatives in this district. Services were held from the United Church at Champion on Saturday afternoon at 2:30 o'clock, Rev. Peter Dawson officiating. Funeral arrangements were in charge of the Snodgrass Funeral Home, Vulcan. Interment was made in the Champion cemetery.

for the use of the curling rink for a grasshopper poison mixing station was left over till the special meeting on June 15th.

During the course of the session L. H. Stack on behalf of a delegation of the Vulcan Branch of the Canadian Legion interviewed the council on the matter of the new School Act which exempts the Canadian Legion from the payment of school taxes. This matter was held over till the next regular meeting of the council on motion by Allan.

The meeting adjourned close to midnight.

Mrs. Grant Mallory Dies In East. Canada

Resident in District for Twenty-five Years; One of the Pioneer School Teachers

Kirkcaldy, Vulcan and the rest of the community that makes this extensive district, was saddened to hear of the death of Mrs. Grant Mallory, who died in the General Hospital, Toronto, on Thursday, May 31st.

About one year ago Mrs. Mallory was suffering from indifferent health and left for Eastern Canada with her son Donald in hope that the change of climate would be beneficial. She visited with relatives for some time but later was forced to enter hospital. There she underwent a major operation a short while ago without any definite results. She was confined to bed till her death.

Mrs. Mallory came west twenty-five years ago and was one of the pioneer school teachers in the territory, teaching at Alston and Parkland until her marriage fifteen years ago.

She took an active part in community affairs at Kirkcaldy. She was pianist at the church and secretary for the school district and gave her services freely to community concert work. For some time she conducted piano classes for the children of Kirkcaldy.

Surviving are her husband; one son Grant, aged 14; and one daughter, Elva, aged 11. Five sisters and three brothers survive, also her mother, who resides in the East. Her father predeceased her twenty years.

The residents of the community extend their sympathy to the bereaved family. She will be sadly missed by the young folk for her home was a gathering place for the kiddies.

ENSIGN NEWS

Mr. and Mrs. Wetherup were Calgary visitors for the week end.

Many local people people took in the sports held at Vulcan on 24th.

Mr. and Mrs. Ferguson were Calgary visitors last week end.

Miss Lillian Archambault, has accepted position at Vulcan Municipal Hospital.

Mrs. Cora Boyd who has spent the last week visiting friends in Bowden returned home this week.

Doyd Brown of Vulcan is operating the municipal grasshopper poison station at Retlaw this year.

Claude Bourque motored from Calgary to Vulcan last Wednesday with Father Cunningham. He returned on Monday to resume his studies.

Mr. L. Brims has returned from a business trip to central part of Alberta. He reports lots of moisture there.

Mr. Wetherup and Mr. Doney were visitors in High River on Monday evening attending the annual district meeting of Boy Scouts' Association.

Mr. H. E. Rollison has taken Mr. Harris' place as agent for Alberta Wheat Pool. The latter has moved to Bowden. Mr. Rollison is welcomed to our centre.

The district has had a steady rain since Sunday night. Over two inches of rainfall. This came just at the proper time, and prospects are for a long wet period.

The depression has not hit the school here if judging by the number of children who will start going to school for their experience after the summer holidays.

Some local fishermen have made very good catches of pike in MacGregor Lake. Fish days have been quite common lately. Never mind, fish is a brain food. We may need a lot of it.

Twenty boys of the Brant-Ensign Boy Scout troop visited High River on May 24th. They drew Vulcan for the ball game, Vulcan winning by a score of 23 to 20.

A quilting party was held at the home of Mrs. Wetherup on May 29th on the boy scout quilt. Tickets are being sold by boy scouts and the quilt will be raffled in June. Funds for the boy scout camp.

Ensign has finally been put on the map. The municipality has been grading a nice outlet to gravel trail. So now you can leave the gravel one mile east of here, go through Ensign and out through Brant and back to gravel trail again.

News Items Gleaned Around the Town

A delegation from Vulcan lodge B. P.O.E. are planning to attend the Provincial convention in Calgary on Monday, June 18th.

A beautiful canary was found in front of the A. Clark residence by Harold King one day last week and is now caged in the King Drug store awaiting its owner.

Plenty of stable room at the Smith coal mine when you bring your team for a load of coal. Prices at a low level, \$2.50 for lump coal and \$1.25 for nut coal. Call at the Smith mine for your next coal.

Another bargain cent-a-mile trip to Lethbridge is being offered through the local ticket office of the C.P.R. from June 18th till 20th. Further particulars may be obtained from Station master Knox.

The Vulcan softball team are planning a tournament for Wednesday, June 6th. Teams from Champion, Nanton, High River, Mazeppa, Blackie, Brant and Lomond have been sent invitations to attend. Prizes are being offered and should prove attractive to the outside teams.

Mrs. (Dr.) G. M. Carson left on Tuesday for Eastern Canada where she will visit friends and relatives at various points. She motored to Lethbridge with Mr. and Mrs. W. S. Hill and at that point joined Mr. and Mrs. R. J. Monds and will accompany them to the east. The journey will be made by automobile.

It has been definitely arranged with Len Davis and His Royal Arcadians that the Saturday night dances will continue throughout the summer season at the Canadian Legion hall. Committee for the arrangements made announcement at the last dance to this effect. These dances are proving very popular.

Arrangements are being made by the tennis club to entertain the Champion players on Sunday at tournament on the local courts. Blackie was scheduled to play here on Wednesday, but the tournament was cancelled. On Sunday the local players turned out enmasse and the two courts were in use all afternoon.

Joe Dobbs Jr., Exalted Ruler of Vulcan Lodge 121, and his staff of officers with other members of the lodge attended the district meeting of the Order held in Champion Tuesday evening. District Deputy Floyd Atkinson of Vulcan was also present. An active business session and pleasant fraternal gathering was reported by the Vulcan visitors.

A meeting to form a lacrosse league was held in Claresholm over the week end. No representatives were present from Vulcan, but it is understood that Vulcan will join in a league if one is formed. Result of the meeting has not been received in town as yet. The Elks will not sponsor the sport locally, but will assist in any possible way to promote the venture, it was learned by the Advocate.

Dominion Bureau of Statistics has asked the Advocate to stress the importance of the rural population sending in the statistical returns required by the government of the Dominion on the cardboard schedules mailed direct to the farmers this season. The acreages of the field crops are the real foundation of the scheme of agricultural production statistics, and only slightly less important is the necessity of having correct knowledge of the numbers of livestock on the farms.

The Vulcan schools' tennis tournament was a decided success. Over forty students participated. Three main events were played and all were well contested with the exception of the boys' doubles. Owing to the weather conditions the final games of the tournament have not been played, but, weather permitting these will be played within the week and the results published in the next issue. The school courts have been put in good shape this season and with the rains should be in excellent condition when the play again starts.

CHARLES CLARK, Proprietor

SILENCING THE PRESS

From Cranbrook Courier

Very often a reader of a newspaper wishes to silence his newspaper on a certain matter. He calls the newspaper names. He says it is one-sided, prejudiced, doesn't have any news in it, has a grudge against him, is controlled by certain interests, then he goes into the office and cancels his subscription. A good newspaper cannot be threatened, bribed, cajoled or punished. It must remain a free agent if it is to do its readers any good at all. It must be fearless and independent. It must look ahead, decide what stand it will take, and always this decision must be based not on whether it will be good or bad for one individual, but whether it will be good or bad for many individuals.

A good newspaper serves all its readers, not just one. If some of its readers disagree, the newspaper is sorry, but it cannot be bribed to betray the best interests of its community in order to hold one subscriber. It may disagree with a man today and agree with him tomorrow. This must be so because a newspaper is a public trust. Its decision must be always based on what will aid the development of the community and bring prosperity to its residents.

Those who disagree with the newspaper must remember that if they could control it easily, that others could also. The newspaper is always open to news and comments on different topics and is glad to get them to enlarge its own fund of information, but must always remain free to make its own decisions.

CANADA BIG SPENDER

"We are one of the most extravagant nations in the world," quotes the Financial Post. This is not referring to individual, but to governmental spending. The individual in Canada can certainly not be accused of extravagance, but the taxation may provide a reason.

The Post says: "The decline of the national income in Canada, the maintenance of expenditures, and the resultant heavy increase in the relative cost of government, are shown in the statistics furnished by the Citizens' Research Institute."

In the government expenditure in relation to national income it is shown that in 1932 (and part of '33) the government expenditure is 32.9 per cent of the national income. In 1928 it was 14.2 per cent and has mounted year by year since that time. The income in 1928 was almost twice that of 1932, but on the other hand the expenditures mounted yearly from that date to 1931, after which there was a reduction of fifty million made. The burden of taxation has increased faster than in other countries.

"It appears improbable from the statistics available on Canada, the United Kingdom, France, United States and Germany that governments of any of these countries spent more in relation to national incomes than Canada's 32.9 per cent for 1932-33.

"Comparable figures on expenditures, however, are not available. Britain and France have been cutting expenditures. Germany may be somewhat closer to Canada as a spender when later figures are available. The United States has a Rooseveltian spending programme that will put Canada's profligacy to shame, but this will not show in the returns until the 1934-35 experience is tabulated. So Canada seems to top the heap as a spender of national income.

"Per capita taxation in Canada is lower than in Great Britain and the United States. This does not allow for our Government's excess of expenditures over tax receipts, which will eventually have to be paid in taxes."

SOIL DRIFTING

An article in the Calgary Albertan of last week, presents quite a picture of soil drifting. It says: "The soil which gave a wheat crop in Saskatchewan last year, may be helping to nourish citrus fruits in Florida next year. On these windy plains, it is said that the farmer never plants his crop twice in the same earth. The movement so far as the Canadian plains are concerned is mostly easterly, and billions of tons of our good earth finds resting place in the Great Lakes, the streets of cities or even the farmlands of the maritimes.

"These dust storms that we know are by no means peculiar to this continent. After such storms aviators have reported great dust clouds 15,000 feet above the earth. It has been found that dust particles from the Sahara have travelled 2500 miles, and on this continent the storms of this spring have carried soil from the west to the eastern seaboard.

"It has been estimated also that in Western United States 850 million tons yearly are carried 1440 miles. In 1928, in Russia, a storm over the Ukrainian plains moved fifteen billion tons of dust to Poland and Roumania. The Ukrainian Institute of Botany checked these figures as accurately as possible.

"The Calgarian may strain bits of the Rocky Mountains from his drinking water and the Winnipegger may wipe from his desk the dust that not so long ago was Calgary. Annapolis apples may be nourished by the soil that last year grew in Saskatchewan the oats the orchardist eats at the breakfast table. What is British Columbia today may be Manitoba tomorrow and Alberta is ever shifting eastward to become some other province."

Another writer in the Lethbridge Herald solves the problem of prairie drought, by suggesting that the unemployed level off the Rocky Mountains, thus giving the damp winds of the Pacific free access to the plains.

Speaking of soil drifting with its attendant evils, one of our English subscribers states that Britain was seriously confronted with soil drifting in one period of her history, and he argues that for that reason, she dare not go into any large scale scheme of grain growing. He says that during and following the Napoleonic wars, every ef-

fort was made to become as self-sustaining as possible, and to that end the land was worked year after year, till the fibre was destroyed and it drifted on the slightest provocation. The gradual return to pasture and fodder crops has been a consequence of the lessons learned early in the nineteenth century.

It would appear that the only solution for the plains of North America is an increasing acreage turned to fibrous growth.

MINERAL RIGHTS 1887

In response to a request from the for information Mr. George Coote, M.P. has very kindly delved into the matter at Ottawa, and the following information is forthcoming on the vexing question of mineral rights vs. surface rights coming:

Authority for the disposition of mineral rights in Manitoba and the North-West Territories (subsequently Alberta and Saskatchewan) is the Dominion Lands Act passed in 1872, and subsequent amendments thereto. The authority for the various mining regulations rests on an amendment made in 1880, by which provision was made that lands containing coal or other minerals should be disposed of in such manner as might, from time to time be fixed by the Governor-in-Council by regulations to be made in that behalf.

An Order-in-Council of 1887, provided "that a clause be inserted in all patents from the Crown for lands situated West of the 3rd meridian (west of Moosejaw), reserving for Her Majesty, Her successors and assigns, forever, all mines and minerals, which may be found to exist within upon or in such lands, together with full power to work the same; and for this purpose to enter upon and use the said lands or portion thereof, to such extent as may be necessary for the effectual working of the said minerals except in the case of patents for lands which have already been sold or disposed of for valuable consideration." This reservation referred to was extended to all lands in Manitoba and the North West by Order-in-Council of 1889.

"It would appear that the laws and regulations made at that time with regard to mineral rights, were made in the public interest with a view to the development of such right," remarks Mr. Gibson, Deputy Minister of the Interior who assisted Mr. Coote in pursuing the quest. Have these developments been in public interest, as originally intended?

Have the governments shown laxity in safeguarding the people's inheritance?

A synopsis of legislation shows certain minor amendments made in successive years.

It is noted that in 1908 and 1927, thought was given to the holders of surface rights in certain legislation. In 1927, the following Federal amendment was made. "Lands containing salt, petroleum, natural gas, gold, silver, etc. may be leased under regulations made by the Governor-in-Council, and these regulations may provide for the leasing of mining rights underneath lands acquired or held as agricultural, grazing, or hay lands, or any other lands held as to the surface only, but provision shall be made for the protection and compensation of the holders of the surface rights, insofar as they may be affected under these regulations."

The foregoing is a brief synopsis of provisions under Federal control, the last clause of which is of interest to surface holders. The next step in this pursuit is to gather information on the legislation enacted since the Natural Resources came under provincial control.

In the volume of information received from Ottawa, it is perhaps worthy of note, though not bearing directly on this question, that tariff items covering petroleum products show that "Crude petroleum in its natural state, 7900 specific gravity or heavier, at 60 degrees, when imported by oil refiners to be refined in their own factories comes in to Canada duty free under all tariffs."

FUTURE OF SMALL TOWN

There has been quite a bit of discussion of late, regarding the future of small towns and their place in the scheme of things. The modern highway has shortened distance to the city, eliminating to a great extent rural dependence on the small town. Will all the thousands of towns and villages along the main highways languish, or can they continue? How might this modern trend affect

It is a coincidence that in hunting items for the Auld Lang Syne column, the should, this week come across R. J. C. Stead's forecast of the present situation Mr. Stead, writing his weekly column for this paper, on May 30, 1912, foresees the decline of many little towns unless saved by acquired industries or other means.

He asks: "Has High River any right to expect to escape this depressing fate? And he answers "I think she has. I believe that she has the greatest opportunity of any Alberta town, and that her future is linked inseparably with the city of Calgary, which will in time be one of Canada's great cities.

"But as a city grows, space is restricted, homes are costly, because of land values. The tendency is to look for an attractive residential point within commuting distance. The city dweller may come to the country. But he can't take the country to the city.

"But if you ask why the city man should come to High River rather than to other towns, I would say the answer lies with the people of . . . Nature has done her best. The town is prettily situated, the soil rich for gardens and lawns. It will soon have water supply, with consequent fire protection. It will probably have continuous light and power service soon. Our telephone service is better and at less cost than in the city. Our educational facilities are up-to-date. Yes, the town has already done something.

"But there is much more to do. The ideal of every citizen should be to make High River a beautiful town, a clean town, a town of moderate prices, of sociability, of goodwill, in a word, a good town to live in. As soon as water is available, the residential streets should be boulevarded. The vacant lots should be cleaned up and turned to garden purposes, if necessary by the town. Everything in the way of clean, legitimate sport and amusement should be encouraged. So many people when they start on a campaign of this kind, seem to think that the town should be made a good place to die in. We want it a good place to live in—Life with a capital L, and all that life represents.

BESSBOROUGH VS
MAYOR OF TORONTO

Who doesn't enjoy a touch of gossip? The following little tit-bit is culled from The Left Hand Corner of the Lethbridge Herald, and tells of a little "run in" between the Mayor of Toronto "the Loyal and Good" and His Excellency Lord Bessborough, which occurred on May 24.

It appears that His Excellency was visiting Toronto, and according to the program, was to have come to the city hall, there to be received in the mayor's office preliminary to proceeding to the reviewing stand. In some way the program miscarried with the result that His Excellency and party arrived at the front door of the city hall instead of the side door as intended, and stood there for some minutes before the mayor appeared. When Mayor Stewart did at last hove in sight, the Governor General is alleged to have said: "Go back to Mary Pickford. Go back to your Mary Pickford Show," referring thus to the fact that the sweetheart of the movies, Toronto-born, had been feted, dined and had received the freedom of the city of Toronto, etc., etc., a day or so previously, a great hullabaloo having been made over her.

And now the Ontario provincial newspapers are making a great to-do about the whole affair. One C.C.F. candidate for the general election says Lord Bessborough ought to resign; other notables declare he should apologize to the mayor, and the affair has been the subject of many heated discussions.

Meantime A. F. Lascelles, secretary to His Excellency has been trying to pour oil on troubled waters by saying that the motor cycle squad which led the Governor to the wrong door of the city hall was really to blame for the whole matter.

It just goes to show that folks who haven't real troubles like grasshoppers and drought, can make their little troubles seem big.

HORSE RACING
AT CELEBRATION

Detailed Report Given Below Received Too Late for Publication Last Week

Horse racing at the Victoria Day celebration was a feature that was missed from the columns of the Advocate last week. The committee of the B.P.O.E. in charge of this section of the sports has since visited the office and a detailed report is now at hand. The races were much enjoyed by the crowd assembled on that day, and although the entries were small in every event, yet they were thrilling. The largest entry was in the farmers saddle race with five. All the other races had three.

The first event was the free-for-all, starting at three o'clock. McLeod of Carmangay won both the first and second, the winner making the round in 54 seconds.

In the relay race, McLeod again copped first place with Jim Dew second. Time 3.30.

The five entries in the farmers' saddle race gave it prominence of the afternoon. McLeod gained first place with Willard and Three-Sons entries coming in second and third. Time 1.14

Horses owned by R. Smith and Adair, came in first and second in the school pony-race.

The winner in the pony race made the track in 16 seconds, a horse owned by Three-sons. Jim Dew and McLeod split second money.

The Bennett buggy race was staged later in the afternoon and had three entries. Willard won the race with Adair a close second.

SEEKING REASONS
FOR NAPHTHA CUTS

At a meeting of the Oil and Gas Shareholders' Protective Association, held in Calgary, it was decided to ask the Imperial Oil Company for specific reasons for the recent cuts on naphtha prices.

Another resolution, which passed unanimously provided for the appointment of a committee consisting of Leon Plotkins, representing the refining business, and F. A. Elves, representing independent operators, to study the reasons for lowered naphtha prices and report back to a further meeting of the association.

According to Albert E. Bingham, president of the association, there were three courses of action which shareholders could take in face of the naphtha price reductions put into effect by Imperial. They were:

(1) Make a request to Prime Minister R. B. Bennett for a probe into the Imperial Oil Company, probably by the Stevens committee.

(2) Inaugurate a publicity program by the insertion of advertisements in the press, and broadcasts over radio stations which might have the effect of inducing Imperial to pay a justifiable price for naphtha.

(3) Formation of an association of independent operators which would enter the gasoline distributing business in direct competition with Imperial Oil.

Mr. Bingham thought the last proposal was the best. It would mean quick action. "Perhaps too quick action," one member commented, amid laughter.

Would Ask for Reasons

Leon Plotkins, who suggested the resolution that Imperial be asked to give its reasons why naphtha prices had been reduced, scouted the reason given by Imperial in the press that it proposed to sell valley naphtha in Manitoba, as it was forced to do so in order to find a market for the product, and this meant greater cost of distribution due to freight rates.

Mr. Plotkins said he had discovered that the Imperial Company had not made application for a freight rate to Manitoba and, as it did not have a refinery in Winnipeg, it would not ship naphtha to that point.

According to Mr. Plotkins, Imperial was reducing the price paid for naphtha for its own personal reason which, he intimated, was to crush competition.

The public would benefit in the near future by Imperial's policy, at least for a time, Mr. Plotkins predicted. He stated the company planned to sell absorption plant gasoline—a much superior product to Turner Valley naphtha—for 12½ cents a gallon, f.o.b. the Imperial refinery in Calgary.

Mr. Plotkins said at the present time there was a market in Western Canada for all the naphtha Turner Valley could produce.—Calgary Herald.

GENERAL NEWS

Nanton school tax rate is 8 mills. There are approximately \$34,000 arrears due the Consolidated district.

After two months in U.S.A. motor-ing 3000 miles, a Taber farmer returns to Alberta to report that the Western States are like a desert.

William Webber, 19 year old boy of Carbon, died in Drumheller hospital as a result of handling grasshopper poison bait.

Mazo de la Roche has a new novel to be published in September "Beside a Norman Tower." It is a story of Devon. "Whitecoats" is to be produced as a play.

Lethbridge constituency public works program is presumed to be limited to \$56,000 which will be spent on the road between Waterton and Glacier parks.

At an I.O.D.E. meeting in Toronto, where the promotion of British films was urged, the provinces reported an increase in use of British films. From Alberta came that figures of the chief censor showed 102 British pictures brought in for 1933, compared with 34 in 1932, 22 in 1931 and 12 in 1930.

Looking at the News
with Col. Hugh Clark

(Continued from Page 1)

The United States policy is to trade with no country that is in default on war debts. This is a notification of the former policy of trading with no country at all—selling, of course, but not buying.

It is rather disheartening that wheat prices advance only on bad news from wheat areas, and that reports of rain send them down again.

The head of the MacDonald Tobacco Company complained to the Stevens Committee that he had not been informed that a reduction was to be made in the excise on cigarettes. Naturally he suspects that his rivals were. Thousands of people not in the business at all could have told him that the tax would have to be reduced because the high price of Canadian cigarettes had started up smuggling operations that would grow in volume until the tax was reduced.

A man who could see no further than he was not entitled to draw \$5,000 a week from the business! On these withdrawals he paid no income tax and apparently he is sheltered by an amendment made for an entirely different purpose in 1930. His annoyance at not being informed in advance of a change in the tax on cigarettes is understandable in a man so engrossed in his own selfish interests.

The tobacco magnate has apologized for some of his statements, explaining that he was irritated by this intrusion into his affairs. "His" affairs indeed! They are the affairs of hundreds of workmen in tobacco factories; thousands of tobacco growers, hundreds of thousands who smoke, and a few millions who are affected by his evasion of income taxes.

There is this to be said in favor of a lobby. Without it some members might have to vote on a question about which they know nothing.

Sequence does not imply consequence, but rioting and incendiarism in penitentiaries came after a few Reds had been incarcerated.

Sam Insull was not altogether to blame for the losses sustained by shareholders in his companies. He advised some friends to buy who could have made a killing if they had sold in time. Later on, he urged others not to buy because the prices were out of line with actual values, but they bought, nevertheless. With rare exceptions they all blame him for their losses.

In a recent wrestling match the two combatants lost their heads according to newspaper reports, and went at each other with their fists until the referee, too, must have lost his head.

Although the proposal was made by a woman with a Scottish name, several Scots have resented her suggestion that the firemen of London, Ont. be arrayed in kilts.

They would go through fire and water

With their chieftain to the slaughter. With their kilts awinging bravely. And the pibroch sounding gravely.

But to go to fires with water—Gosh, woman, do ye no ken the kilts were no-intendit for sic purpose.

HOW TO PROFIT BY LOVE OF GAMBLING

An ingenious idea is presented in a recent letter written to the Calgary Herald by Frank Malne, of Calgary. Going on the obvious assumption that the spirit of gambling is inherent in human beings and cannot be stopped by legislation, the suggestion is that the weakness be turned to public profit, in such a way as to combine thrift and safety and give the gambler a chance at a small fortune or his money back. The article suggests that the government organize a sweep-stake.

Let us suppose that the government desires to float a loan for \$34,000,000 for 25 years at as little cost as possible and below the market rate as regards interest paid.

This loan will be floated in 1,000,000 numbered bonds at a par value of \$34 each. The bonds will bear interest at the rate of dollar per year, which is slightly less than 3 per cent. Each bond will bear coupons for 25 years' interest. This loan, however, will stand on the government books at the rate of 4 per cent interest. This extra 1 per cent will be the prize money.

The government is therefore, going to get the money for 4 per cent, which is rather cheap these days.

Each year when the interest is due there will be a drawing for the prizes. The bond issue of 34 million at 1 per cent will give \$340,000 interest to be used for prizes. There will be 2315 ranging from the \$25,000 first prize to 2000 prizes of \$100 each.

These 2315 bonds drawn as winners will have to be surrendered to the government, and cancelled when the money is paid out, so that winners will not participate in another draw on the same bond.

The government will thus gain these bonds at par value of \$34 each plus interest. It still has the \$34,000,000, and there will be yearly drawing for the 25 years the bonds are in existence. Each year 2315 prizes and 2315 surrendered bonds. At the end of 25 years \$1,967,700 worth of bonds will have been cancelled, and the remaining bonds will have to be paid at a cost of \$32,032,300.

The letter concludes: "So we see that the government gets cheap money, makes money on the deal, everyone gets a gamble and no one loses anything, so all are satisfied."

"The bonds would be made up in books of thirty-five. Each bond would sell for \$35 and bear 25 interest coupons at one dollar per year. The seller of the bond would return to the government \$34 and retain one dollar for his trouble."

"This scheme would encourage thrift and a great number of people would strive to get one of these bonds. Savings in the banks would be taken out and put into circulation. The money cannot be lost as it is in the hands of the government, and it would satisfy this prevalent spirit for a gamble."

VULCAN DEFEAT SUNNY GLEN

Vulcan softball team journeyed to the Sunny Glen grounds at the farm of Mr. Mensinger on Sunday and played a return game with that team. Under the able coaching of Ralph Fritchard the locals gained their way to a 27 to 2 victory. They displayed good teamwork and not until the ninth inning did Sunny Glen find the home plate. Earl Robson, Vulcan hurler, held the Sunny Glen nine to eight hits and played an excellent game, having perfect control over the ball at all times. The locals have a hard-hitting team this year and should provide the town with some good exhibitions of the game before the end of the season.

SUGGESTIONS FOR GOOD CLASSY GOVT

How About Newspapermen Dictating Principle and Policies of Province

The Hanna Herald a few weeks ago came through with the brilliant suggestion that newspapermen might enter Parliamentary life, to contribute a large element of commonsense and novelty. Herb McCrea of the Herald goes farther, and drafts a whole provincial cabinet from the editors of Alberta weeklies. The big flaw in his slate is that he leaves out Herb McCrea, the kingpin of them all. At any rate, the newspapermen have been in the happy position of observers and critics for so long, that these responsibilities should find them with many theories that they might like to try out. The Herald's suggested cabinet is:

For premier we suggest A. L. Horton, of the Vegreville Observer. He has been telling governments what to do for so long that he should have no difficulty in actually doing the things he has been advising. That's not a slam, even if it sounds like one.

Fred Turnbull, of The Red Deer Advocate, is hereby nominated for minister of public works. A level-headed business man with plenty of experience and a lot of good horse sense.

Minister of Finance, Charles Clark, High River Times, whose chief asset for that job is a nativity in Bruce county, Ontario. He wears no man's collar!

D. O. Wight, Cardston News, is hereby suggested as minister of education. No mistake made there!

Minister of agriculture, Victor French of Wetaskiwin Times, who combines farming with publishing.

Minister of Municipal Affairs. A politician is needed here, so we'll nominate the only one in the weekly news paper ranks—H. G. "Lucky" Thunell, Viking News.

Attorney General. Here's a stickler. Not a lawyer in the whole gang! But Ben Hucklell of the Innisfail Province can fit in most anywhere and so Ben goes down for this job.

Minister of Health, Mrs. Conquest, Athabasca Echo.

Minister of Natural Resources, W. J. Bartlett, Blairmore Enterprise. The big boy can handle that portfolio!

Minister of Labor, Sam Hodson, Okotoks Review. 'Nuff sed!

Minister without portfolio, George Gordon, Ponoka Times.

This government may not be a class government—but it will be classy.

WARNING ISSUED RE HOPPER POISON

The High River Health Unit in this issue, gives warning to the public to exercise caution in the handling of grasshopper bait which is highly poisonous in nature.

When through scattering the mixture, the clothes should be changed, and these clothes should be washed when the job is through.

In handling, every care must be taken not to put the hands to the mouth, and if any mixture touches the skin it should be immediately washed off.

In handling use either rubber gloves or strong leather gloves. Before putting these on, smear the hands and arms with vaseline, axle grease, crankcase oil, or similar substance to cover the pores.

The bait is being used with such frequency, by such a large proportion of the population, and in such quantities, that the Health Unit considers it advisable to warn people that care in handling is extremely necessary.

AGRICULTURE AS BASIS OF CANADA

Agriculture is the basis of Canadian economic life. The Dominion possesses a highly developed manufacturing organization, but agriculture is much the largest branch of primary production, and it affords employment to nearly 30 per cent. of the population. It is the source of about 24 per cent of the gross production, and constitutes a quarter of the estimated wealth of the country. Something over 30 per cent of the value of all raw materials used by Canadian manufactures consists of Canadian farm products, and roughly 25 per cent of the gross value of manufactures is accounted for by manufactures of Canadian farm origin. Approximately 85 per cent of the total agricultural production of the Dominion is consumed in Canada, the remaining 15 per cent finding markets abroad. About 40 per cent of the total export trade is provided by agriculture.

The leading field crop is wheat, in which Canada is exceeded in production only by the United States and Russia. Much the greater part of Canada's wheat finds its way into the export market. Three other grains—oats, barley, rye—have assumed notable importance among the other field crops of the Dominion. The oat crop has attained a maximum of nearly 564 million bushels, barley 136 million and rye 32 million bushels. The greater part of these crops is consumed in the home market. Wheat is the basis of the flour milling industry, which ranks fourth among the manufactures of the Dominion.

Livestock, as a branch of agriculture, stands third in point of productivity, while a similar position among manufactures is occupied by its industrial derivative, slaughtering and meat packing. Cattle are most numerous among livestock on Canadian farms, including, of course, both beef and dairy animals. In 1933 cattle are estimated at 8,876,000, swine 3,800,700 and sheep 3,385,000. The wool clip in 1932 amounted to 20,518,000 pounds. Poultry in 1933 numbered 59,324,000. Exports of cattle and of bacon and hams figured prominently in Canada's external trade last year. Exports of cattle in 1933 totalled 60,600 head compared with 33,000 head in 1932, the United Kingdom absorbing five-sixths of the total. Bacon and ham exports in 1933 amounted to 732,000 cwt. against 358,000 cwt. in 1932, the United Kingdom again providing the principal market.

Dairying
Dairying, ranking second only to field crops in revenue among branches of agriculture, stands fifth among Canadian manufacturing industries.

Besides the leading products already described Canadian agriculture has developed a number of specialized crops, in the production of which certain localities have particular advantages. Canadian apples from Nova Scotia, Ontario and British Columbia have won recognition in the United Kingdom and other countries, the total crop in 1932 being 2,789,000 barrels. South-west Ontario and British Columbia are also specially suited to the growth of delicate fruits such as peaches and strawberries. Tobacco grown in south-west Ontario and some parts of Quebec finds a market in the United Kingdom and the United States as well as in the Canadian industry, the crop in 1932 being 54 million pounds. Canadian grown beets supply about one-seventh of the refined sugar output of the Dominion. The sugar beet crop, 505,000 tons in 1932—the refined beet sugar output being 132 million pounds—is grown in the neighborhood of the beet sugar factories at Chatham and Wallaceburg, and Raymond, Alberta.

WHOLESOME DIET ON VERY LITTLE

Family of Five Can Have Substantial Diet on 27 cts. a Day. Try and Do It.

The Calgary Herald quotes a statement on balanced budgets from the Christian Science Monitor. The matter is brought up through discussions of relief allowances. The Monitor says that Columbia University has brought out a schedule by which a family of five can have a varied and sufficient diet on 27 cts. a day. This is not given as 27 cts. a day per person, which would mount up, but an actual cost of \$8.10 for a month for five people.

"A typical menu for the family provides a breakfast of cereal with bananas, milk and sugar; toast and butter, a glass of milk for each child. For luncheon, macaroni and cheese, stewed tomatoes, bread and butter, a glass of milk for children and adults. "For dinner the menu provides liver loaf, potatoes, baked or creamed cabbage and carrot salad, dressing of top milk, sugar, vinegar; gingerbread with whipped evaporated milk, glass of milk for each child."

This is much better variety than many people who are not on relief can afford. If other day's menus match up with this it would seem quite substantial living to most people.

But is there anyone who would undertake to provide the food mentioned for 27 cents a day. Not in Alberta. Take the articles named, cereal, bananas, milk, sugar, toast, butter, milk, a glass of milk for each child, macaroni, cheese, tomatoes, five more glasses milk, liver, potatoes, cabbage, carrot, gingerbread, more milk for the children. Figure it up on Alberta prices. It would come much closer to \$1.00 perhaps more.

HON G HOADLEY IS MIN TELEPHONES

Cabinet Re-Organization Places F. Grisdale of Olds as Min. of Agriculture

An appointment of importance was made this week, when Hon. George Hoadley was sworn in as Minister of Telephones and Health, and Frank Grisdale of Olds was sworn in as Minister of Agriculture. Premier Brownlee in giving to Mr. Hoadley's charge the important post of Minister of Telephones said that the telephone system is regarded as a major problem, requiring the attention of one of the most experienced ministers. Mr. Hoadley's absorbing interest in the problems of health of the province is also well known.

Mr. Grisdale has long been mentioned in connection with the Department of Agriculture and his appointment is no surprise. His specialized work in livestock at MacDonald College, and his work as principal of the Olds Agricultural School have given him academic knowledge, and his experience as a practical farmer gives further qualification.

It is expected that further cabinet re-organization will include the administration of the new Trades and Industries Act.

ELLIS MINE—Wm. Ellis, Jr., Mgr.
NEW VULCAN MINE—M. Popovitch, Mgr.

Where does your merchant keep PERISHABLE Food?

YOU'RE probably a bit "fussy" in your home about the foods you serve, careful to guard them from disease-bearing Bacteria by correct refrigeration below 50 degrees from the moment they enter your home, because you know that unless perishable foods are protected from the heated atmosphere they quickly lose their freshness and may endanger health.

DOES your merchant safeguard the foods which you purchase by using Electric Refrigeration, or IS YOUR FOOD IN DANGER before it even reaches your home?

NEXT time you go shopping for food why not look around the store and see if you are getting this definite assurance of freshness. YOU'RE ENTITLED TO IT.
